

East Butler Road Corridor Study

Fact Sheet No. 1 / July 2015

Public Drop-in Meeting Kicks Off Multimodal Study

The City of Mauldin is undertaking the East Butler Road Corridor Study to build a broad consensus around the types of improvements that will best meet current and future transportation needs along the corridor. The study will consider ways to enhance the efficiency of traffic flow, overall safety of the roadway, and bicycle and pedestrian mobility. A number of specific intersections along the corridor will be studied as part of the project, including Bethel Drive, Old Mill Road, Murray Drive, and Owens Lane.

The purpose of this initial meeting is to hear from the community about what is important to residents and businesses who utilize East Butler Road. Your input is essential in determining community expectations. The feedback received tonight will be used by the project team in the next phase of the study to evaluate design solutions. A number of conceptual alternatives will be created and future public meetings will be held for the community to evaluate the generated concepts.

Tonight's meeting has two goals:

1. To provide information about the purpose and objectives for developing a corridor study for East Butler Road and educate participants on opportunities presented by the project; and
2. To hear your desires for the East Butler Road corridor to better understand what is important to you.

Provide Input Online

All are encouraged to provide additional comments digitally, by accessing the project [WikiMap](http://wikimapping.com/wikimap/East-Butler-Road-Corridor-Study.html) (a web-based interactive mapping platform specifically tailored to East Butler Road). The map "crowd-sources" data created by users and provides the project team with further insight on local concerns and desires for the East Butler Road corridor. Users are able to locate routes that they find desirable or undesirable to walk and bike, as well as pinpoint specific locations of interest or areas with safety concerns. Test drive the WikiMap tonight, or access it at home via:

East Butler Road Corridor Study

Fact Sheet No. 1 / July 2015

Study Area will Provide Context for Initial Analysis

The map below depicts the area of interest for the East Butler Road Corridor Study. The study area includes East Butler Road from Main Street to Bridges Road. Adjacent areas will also be evaluated for context and potential opportunities. Recommendations will seek to provide efficiencies and safety improvements to positively influence future development along the corridor.

Please utilize the larger maps provided tonight to document specific concerns and comments.
